Weather Key Points

Regional Operations Center

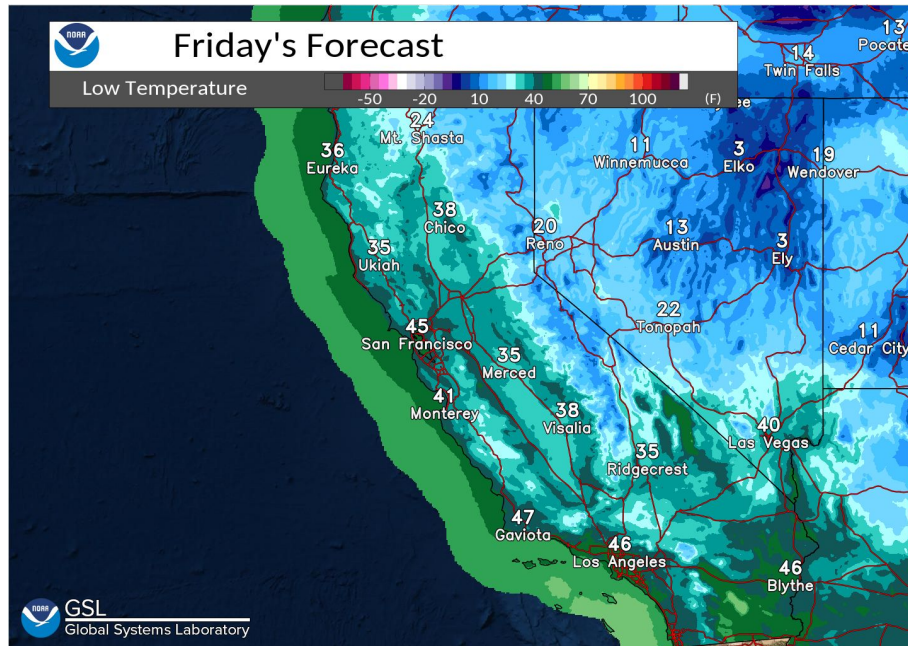

Western Region

Thursday, November 10

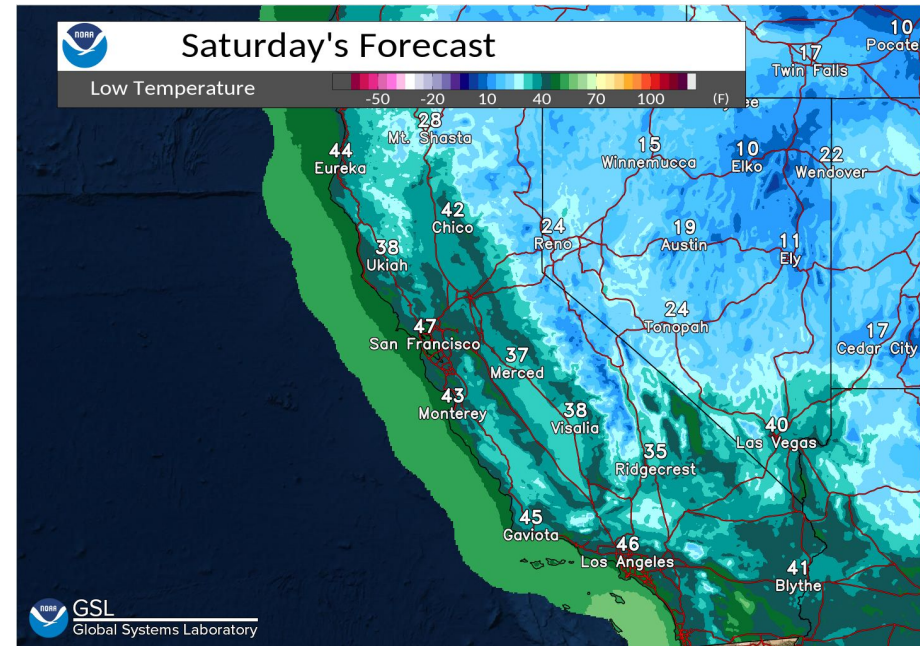

- Below normal temperatures will be seen statewide through the weekend and early next week, with overnight low temperatures dipping into the 30s across the Central Valley and even for areas closer to the coast at times. Readings over the higher elevations will reach the single digits.
- Areas of overnight/morning dense fog are expected across the Central Valley through the weekend, with visibility locally reduced below one-quarter mile in some areas. This may locally impact travel.
- Locally breezy winds gusting up to 45 MPH are possible in portions of southern California Thursday through Saturday.
- Light valley rain and mountain snow is expected across far northern California beginning late Friday but especially on Saturday, including the northern Sierra. Snow levels will hover between 3,500 and 4,500 feet, though no widespread or significant impacts are expected at this time.

Forecast Low Temperatures
